Subject: ksdk please call immediately....

Bob Criss is saying on the record it is his opinion radioactive nuclides have reached the Westlake landfill fires via groundwater. I asked him repeatedly how he knows this and he says he's been saying it for months.

In addition he's calling on the EPA to step aside and let nuclear experts at DOE come in and take over.

WE DO NOT WANT TO CREATE PANIC.....PLEASE CALL ME ASAP! 314-803-9143...

He did say this is not cause for panic BUT concern.

I'm going into a meeting with my boss to discuss how to handle this.....
